

## **MXI Security and Diino put digital online protection at the tip of your finger**

### **Stealth MXP biometric USB device provides authentication to unlock access to Web-based storage and file sharing services**

Communiqué  
August 21, 2008

Stockholm, Sweden and Montreal, Canada - August 21, 2008 - Diino, a provider of secure Web-based file storage, access, and distribution, and MXI Security, the leader in superior managed portable security solutions, today announced that they have signed an agreement to offer their customers a unique combination of strong authentication and ease-of-use for protecting access to data stored online on their Diino desktop.

"MXI Security's mission is to provide companies and governments with state-of-the-art security solutions to protect portable data and applications for any computing environment. We believe that biometric multifactor authentication sets the security bar high against identity theft or data loss while preserving ease-of-use for end-users." says Lawrence Reusing, CEO of MXI Security. "Our partnership with Diino is an important step toward making sure our customers can benefit from greater mobility without compromising their digital security."

By simply swiping their finger on MXI Security's Stealth MXP Biometric USB device, customers will automatically and securely access their Diino account where they can safely and easily store, access, share, and backup files of any size, from any location. In addition to featuring the most secure authentication with FIPS 140-2 Level 2 validation, the Stealth MXP device offers transparent on-board hardware encryption, allowing customers to securely store data that will be made available or retrieved from their Diino Internet Desktop. MXI Security's Stealth MXP devices are trusted by the most demanding customers and have been adopted by government agencies worldwide to protect access to their most sensitive data, applications, and systems.

"Diino allows you to store, access, share, and backup your digital documents while maintaining a wall of privacy between your information and the Internet. In combination with MXI Security's solutions, we will create a product that is extremely appealing to customers that demand high security and flexibility when handling information," says Jan Nilsson, CEO of Diino. "We offer online services to more than one million customers worldwide, and as a market leader we're looking to offer value-added services that will protect our customers' privacy and online identity".

**About MXI Security**

*MXI Security, a division of Memory Experts International Inc., leads the way in providing superior managed portable security solutions designed to meet the highest security and privacy standards of even the most demanding customers.*
