

MXI Security Offers Encrypted Devices with McAfee AntiVirus Capabilities

Up to 32GBs of Encrypted USB with Onboard Malware Protection

Montreal, Canada, September 1st 2009 – MXI Security, Inc., a US manufacturer of superior managed portable security solutions today announced that McAfee[®] antivirus protection will be an available feature on MXI Security-based secure portable storage devices and will ship with every FIPS-validated McAfee encrypted USB device.

With MXI Security's devices and McAfee's embedded [antivirus security protection](#) organizations will be reassured that these devices do not become carriers of malicious software. An automatic anti-malware scan on the device that can identify malicious software, such as a virus, worm or Trojan horse, and in turn prohibit them from being transferred to the devices.

“Customers will benefit from the additional peace of mind that comes from using MXI Security secure removable storage devices with McAfee Antivirus capabilities on board,” stated David Scholtz, senior vice president of strategic alliances and OEM sales at McAfee. “This furthers the value currently provided by MXI Security and McAfee to customers via the simplified management, auditing, and policy enforcement capabilities of McAfee ePolicy Orchestrator integrated into MXI Security devices.”

“With MXI Security's tight integration with [McAfee's ePO](#) security management console, we are providing IT administrators the ability to remotely manage, control and enforce security policies on USB devices across networks,” said Lawrence Reusing, CEO of MXI Security. “This provides a complete solution for security of removable devices that is friendly to both users and I.T. administrators.”

Organizations worldwide turn to MXI Security-manufactured secure portable storage devices, sold by partners like McAfee, that feature the power of strong user authentication, digital identity and data encryption to secure their data, applications and networks wherever their personnel travel around the world. Organizations interested in purchasing MXI Security encrypted USB devices can contact sales@mxisecurity.com and government customers can also find MXI Security, a division of Memory Experts on [GSA Advantage](#) under GSA Schedule GS-35F-0142S.
